- Micro Organisms like Fungi, Earthworms, worms are helps to make the soil fertile. By giving more nutrition to the soil and makes the soil health good and the Micro Organisms plays a virtual role in improving soil fertility that are it makes a soil fertile and more Nutritionable. And by adding Nutrition and more valuable soil Add it maintains a Soil health.

d) Natural Farming:-

It is the process of growing crops without adding any chemical fertilizers. It is a natural process in that the soil will be fertile and good germination soil health and natural farming also an a natural in that we are sowing, harvesting all are there. It does not add any chemical fertilizers good for users.

∴ The important components of natural farming:-

- Soil health:- By the natural farming the soil doesn't harm because in the natural farming we don't add chemicals fertilizers or any harmful things.
- Proper and Good product:- It provides proper and good products without chemical fertilizers naturalists.
- Health maintenance

5. "The Impact of Mechanization on Agriculture."

"Mechanization has need a transformation impact on Agriculture or escaped throw the forming and in Conducted and significantly Enhancing productivity Efficiency and Sustainability"

- Increased productivity :- Mechanization spread up agriculture process like preparation of Sowing irrigation, harvesting and post harvesting This is called higher crop and post harvesting and it is a high yielding crops allow the cultivation in a less time.
- Labour Saving :- Mechanization reduce the productivity or the reduce dependence on manual labour add resolving labour short and decreasing physical strain on farmers machine and labour intensive
- Timely Saving Irrigation, harvesting or Optimizing crop growth and Growing Minimizing and loss due to the adverse to weather.
- Improve resources use Efficiency provision of seed fertile fertilizers and pesticides reducing

wastage Environmental pollution.

- Enhanced Crop quality :- Uniform operation importance and quality appearance and marketability of agricultural produce
- Economic Growth increased productivity and reduce input cost improve farm profitability and contribute to rural Economic development
- Climate Resilience :- (Mechanization) Mechanized irrigation and Soil management help to Mitigate impact of drought and erratic rains flows improving Agriculture resilience.
- High Initial Skill Requirement :- For this Mechanization - on high initial skill Requirement is Very important
- Environmental Concern :- For the Mechanized agriculture depends on Environmental and it harm the Environment.
- Employment impact :- For this practice the Employment is reduce and people are in their Unemployment.

2. The impact of Green Revolutions:-

Mannure like dead and decaying plants and animals and Animal husbandary also gives a Nutritional power to the living beings. and to the Agricultural land and to the Soil.
- By doing Animal husbandry we are helped in Mannure like Cowdung, Cow Urine, This all are very much nutritional and Make the Soil.

The Soil More Fertile and Good Soil health.

- Low dung, Low Urine maintains good Soil health and Maintains the Soil fertility. In Agricultural land it Makes a very much useful and Animal husbandry Makes a Agriculture land fertile and Soil health.

7: "The advance trends in Agricultural practice in India"

The advance trends in Agricultural practice in India are:-

- In the Agricultural Fields using Machinery like Tractors and irrigation like pipes and Machine to sowing the Seeds.
- For ploughing the Seeds the Tractors Machines and the Major Agriculture seed ploughing are in the advance trends in Agricultural practice in India.
- Irrigation practice is water supplying to the plants, Crops is very much advanced in the Agricultural practice like, drip irrigation, Surface irrigation and Underground irrigation.
- In the Agriculture practice new advance Technique has come that is "Drone Sowing".

Drone sowing :- Sowing the Seeds by the help of Machine like Drone it is One of the advance

Technology.

- Agricultural practice tends after sowing the seeds the seed harvesting. Many Machinery after the seed ploughing for making the seed or crop harvest many seed Machine has come.
- And the seed coated by advance Chemical Fertilizers and many advance Fertilizers has come in the Agriculture fields.
- For making crop weeding and sowing proper seed and then harvesting the land crops all Machines come in the advance hands of Agricultural practice in India.
- Pits or dibbling & here the small holes are made and put the seed on it. This takes time but makes a good germination and good quality crops and do not waste the poor seed. This is all so called as the advance Technology of Agriculture practice in India.
- Machines :- New Machinery has come into Agricultural land that are harvesting Machine.

Tractors, & SCB and other ploughing Agriculture land it is the one of the Advance trends in Agricultural practice.

Fertilizers:-

Fertilizers is the One of the best supplying the nutrient to the Crops.

There are two types of Fertilizers they are:

1) "Organic Fertilizers"

2) "Inorganic Fertilizers"

1) Organic Fertilizers:-

→ These are the Fertilizers to which the No Chemical Fertilizers are used.

For Example :- Cow dung, Cow Urine, etc

2) Inorganic Fertilizers:-

→ These are the Fertilizers to which the Chemical Fertilizers are used.

for Example ammonium sulphide and Nitrogen

Role of Nutrient Management

- By the Fertilizers the more number of Nutrients are provided.

- Better Germination of the Crops and the Soil

Fertility and the Good management of the
Nutrient Supply.

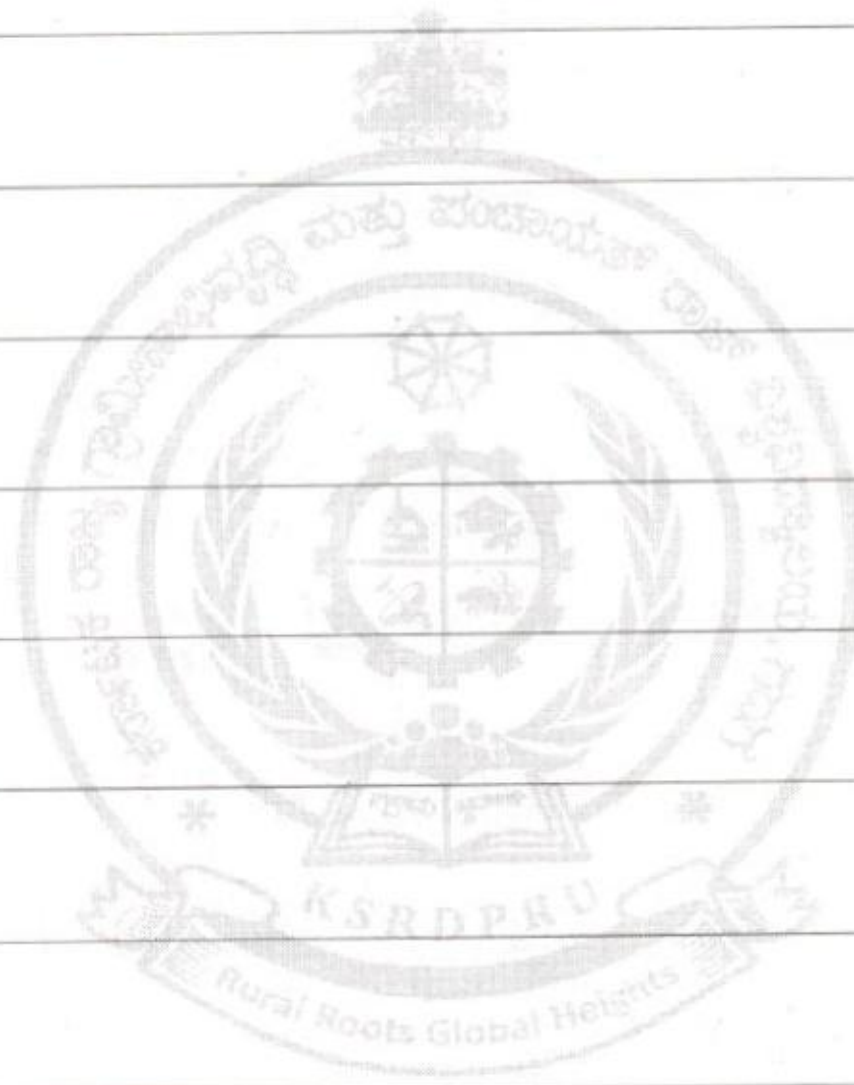

By using this the nutrients was supplied to the
Crops and making crops good better germin-
-ation.

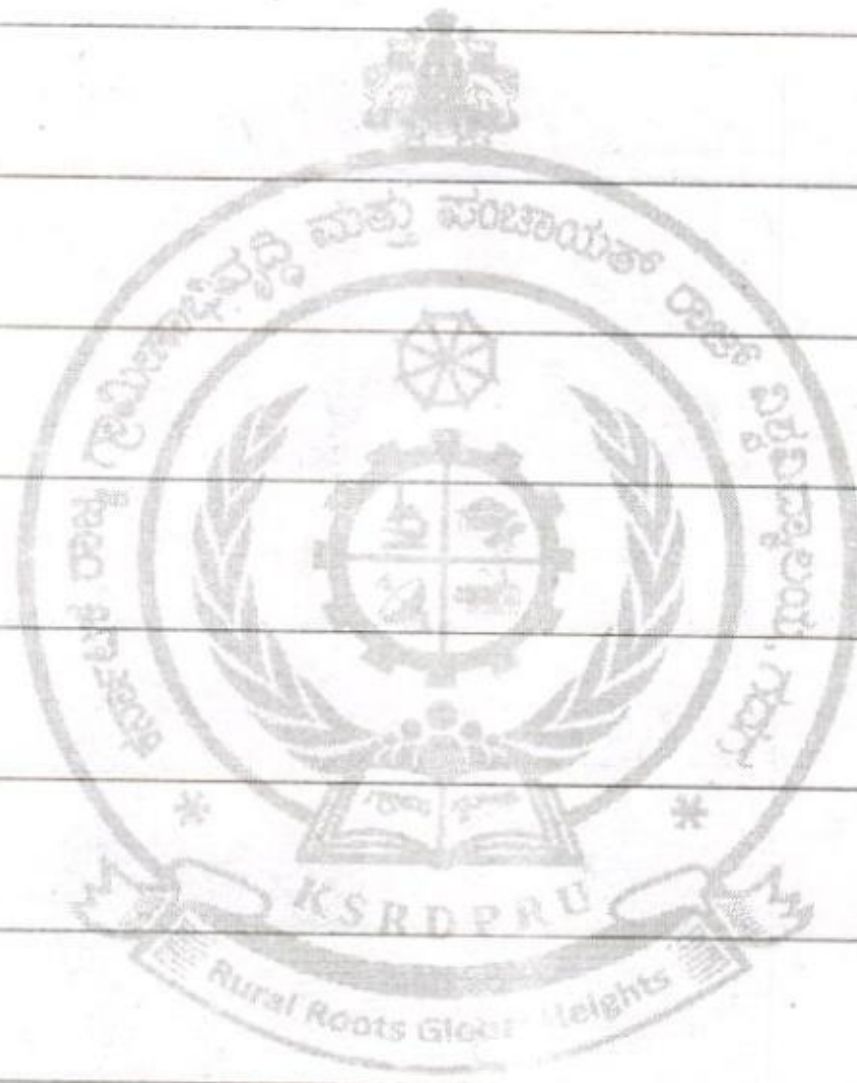

Good quality of the Crops are grown in the Fertiliser
Supply that are Cowdung, Cow urine these are
very much containing Nutrient based.

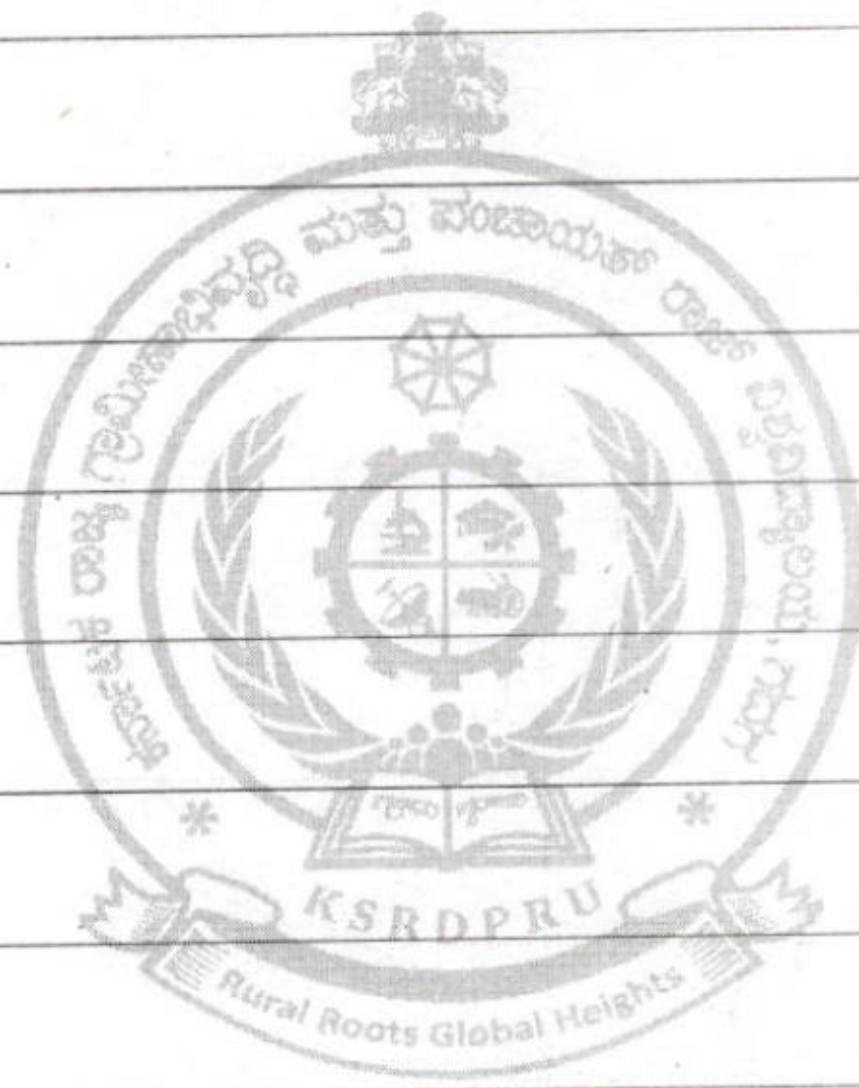

nutrient management by the both Organic
and Inorganic Fertilizers but the
Organic Fertilizers is best for the Nutrient
and Good Nutrients Supply.

Organic like Cowdung, Cow urine and the
are Main based in Soil fertile it
gives the Soil health. good nutrition and
by that we are also consuming good
health.
